

**Gate valve F4/F5 or equivalent**

**Resilient-seated full bore gate valve**

**Shut-off valve for drinking water and waste water up to 60° C**

**DN 500 - 1200, PN 10 - 16**

**Face-to-face length DIN EN 558-1, basic series 14 and 15 (DIN 3202, F4/F5)**

**General information:**

- Rubber vulcanized wedge
- Maintenance free and corrosion resistant stem seal with O-ring sealing
- Full passage
- Bi-direction flow, tight in both directions
- Flange connection dimensions to EN 1092-2
- Body, cover and wedge made of ductile cast iron GGG40
- Wedge fully vulcanized EPDM or NBR rubber
- Operating pressure: DN 500 – DN600 PN10 / PN16  
DN700 – DN 1200 PN10
- Stem: waste water resistant stainless steel 1.4401
- Stem nut: zinc-free cast bronze
- Set for underground installation
- Available with gearbox, from DN1000 as per our standard

**Corrosion protection:**

- Inside and outside epoxy coated, coating thickness >250 µm, blue RAL 5010

**Variations:**
