

Ball check valve type 4900 or equivalent

Ball check valve to EN12334

Water and waste water up to 50°C

DN32 – 600, PN10

Face-to-face length DIN EN 558-1, basic series 48 (DIN 3202, F6)

General information:

- No mechanically actuated parts
- Free flow cross section, full bore
- With NBR vulcanized ductile iron sinking ball
- Ball can be replaced without dismantling the valve
- Flange connection dimensions to EN 1092-2
- Body and cover: ductile cast iron GGG40/50
- Bolts and nuts: stainless steel 1.4301

Corrosion protection:

- Body: inside and outside epoxy-coated, coating thickness >250 µm, blue RAL 5010
